

# Contek Solutions and Optical Gas Imaging

Want an easy solution to locate emission gas? We can help.

## What is Optical Gas Imaging (OGI)

- OGI technology converts gas emissions gas into visible black and white images that appear as smoke.
- Leaks are instantly visible, allowing you to quickly trace them to their source.
- Images are captured on digital video and/or still images.

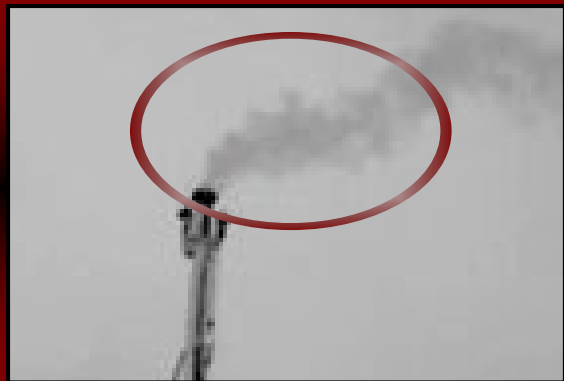

## Economic Benefits

- Quickly locate large leakers and prioritize leak repairs.
- Capture lost revenue.
- 100% accurate. No false positives.
- Lower compliance and operating costs. Survey large number of components in minimal time.
- No interruption of operations.

## Safety and Environmental Benefits

- New mandatory GHG reporting compliance.
- Increased employee and public safety.
- Proof of leak repairs.
- Reduced human exposure to chemicals and potential explosions.
- Reduce environmental fines.
- Reduce emissions and emission fees.
- Strengthen environmental stewardship efforts.
- Effective compliance tool/practice.

<b>Detectable Gas</b>	Hexane	MIBK	Toluene	Methane
Ethanol	Isoprene	Octane	Xylene	Propane
Ethylbenzene	Methanol	Pentane	Butane	Ethylene
Heptane	MEK	1-Pentene	Ethane	Propylene
